PARTNERS IN MEDICINE: www.utahpim.com
Partners In Medicine is a group dedicated to the support of the University of Utah Intern, Resident, Fellow and their significant others. We are a diverse group of men, women, and children from all over the country. Although we come from various backgrounds and points of view, we share a common bond - surviving residency. PIM is the group you can turn to who truly understands the difficulties inherent in being the significant other to a Resident Physician. Our organization provides a tremendous network of people and activities to help you make new friends and have fun during residency. For many of our members, PIM has become their family away from home.
