Continental breakfast and lunch, and the Grant Application Writer’s Workbook provided.

Space is limited!

Register by Friday, September 13, 2019

John Robertson, PhD has been the recipient of competitive extramural funding from both the NIH and non-federal sources. He has served as a member of grant review panels, a reviewer for various biomedical journals, as well as a member of journal editorial boards. Before his recruitment to GWSW he served as a mentor for junior-faculty grant applicants and was recognized routinely for excellence in teaching.

This widely acclaimed seminar comprehensively addresses both practical and conceptual aspects that are important to the proposal-writing process. Emphasis is given to such things as idea development, identification of the most appropriate granting agency, how to write for reviewers, and tips and strategies that are of proven value in presenting an applicant's case to reviewers. Regardless of the agency, participants are taught to write with a linear progression of logic, which leads reviewers through their applications. Strategies designed to merit a fundable priority score are emphasized.

The NIH version of The Grant Application Writer’s Workbook is included with each registration. Grant Writers’ Seminars & Workshops workbooks are your guide to a competitive application. Each workbook offers a practical, step-by-step approach to grant writing. Each version begins with refinement of the idea and then systematically progresses through tips and strategies for each section of the proposal, concluding with pre-submission review and writing of the accompanying cover letter.

Registration Fee: $300
