Interprofessional Advanced Fellowship in Addiction Treatment

A two-year, multi-site fellowship that provides interdisciplinary research, clinical, and educational training to prepare physician, post-doctoral, and post-masters level fellows as leaders in the field of addiction treatment.

Our fellows represent a variety of disciplines including medicine, psychology, nursing, chaplaincy, pharmacy and social work. They share a commitment to reducing the burden of alcohol and drug use disorders in Veteran populations. Seven local sites offer unique training opportunities and are linked through a common interdisciplinary addictions curriculum and opportunities for cross-site collaboration. Visit the Coordinating Center at https://medicine.utah.edu/internalmedicine/epidemiology/parcka/education-training/iafat.php or contact any site to learn more:
