How to install Printers on Windows 10
Right click in the bottom left and go to Control Panel.
Go to Devices and Printers
Click on Add a Printer
Select the printer that I want isn’t listed
Select Add a printer using TCP/IP
Enter the Printers DNS Name
Should be on the printer
It should automatically load the proper driver.
Select Do Not Share

Printer Sharing

If you want to share this printer, you must provide a share name. You can use the suggested name or type a new one. The share name will be visible to other network users.

- Do not share this printer
- Share this printer so that others on your network can find and use it
