Medical Ethics and Humanities in Utah

Spring 2020

Caring—How can we work together to address drug shortages and drug costs?

Q & A with Erin Fox, PharmD, BCPS, FASHP,
Senior Director, Drug Information and Support Services, UHealth

Erin Fox, Senior Director, Drug Information and Support Services at UHealth, and Program in Medical Ethics and Humanities faculty, Jim Ruble, PharmD, JD, led an Evening Ethics discussion in November 2019 that educated us about some of the ongoing actions to improve drug shortages and high drug prices. Dr. Erin Fox answers some of our questions below:

News stories about drug shortages and drug quality are increasing. What is being done about these important issues?

During 2019, the FDA conducted multiple meetings and listening sessions in an attempt to determine the root causes of drug shortages. Their report was released at the end of December 2019. Overall the report highlights 3 key root causes:

1. Lack of incentives for drug companies to make inexpensive products.
2. No reward for manufacturers who choose to invest in quality—leading to some companies having poor quality resulting in drug shortages.
3. Challenges that make it difficult for companies to enter the market to help with or resolve a shortage, or for companies to make their own recoveries.

Quality problems result not only in drug shortages, but in general concern for patient well-being. A recent new book, Bottle of Lies, by Katherine Eban highlights the problem of outsourcing production to areas of the world with different regulatory and quality perspectives. Common medications such as blood pressure and heartburn medications are being recalled due to contamination or general poor quality—leading to shortages and uncertainty.

What is being done about this problem?

Congress is becoming more interested in potential solutions to this problem. Senator Collins recently introduced legislation to aimed at addressing some of the problems that lead to drug shortages.

Meetings and hearings are expected during 2020 that focus on pharmaceutical quality, including the need to consider pharmaceutical availability a component of national security.

Market-based solutions are also being considered. Civica Rx, headquartered in Lehi, UT, is focused on improving access to medications in short supply and providing high quality products. Civica’s innovation is providing drug companies with a guaranteed volume for a specific time period, something not available to drug companies with current contracting models.

Evening Ethics Discussions

These informal, multidisciplinary discussions about current issues in medical ethics take place approximately bi-monthly or as ethical issues arise. A PMEH member facilitates discussion. Guided by the topic, we invite people with relevant expertise and experience and informed opinions to join us. Generally about 15-40 people from a variety of disciplines, including healthcare, public policy, philosophy, law, and business attend. We distribute short, timely articles from the nation’s most thoughtful newspapers, journals, and magazines to the group in advance of our discussions. CME and light refreshments are offered.

“Asperger, Autism, and Nazi Medicine: Perspectives from a Historian” with Dr. Edith Sheffer

Tuesday February 4, 2020
5:30pm-7:00pm
Lower Level, Eccles Health Sciences Library

January 27th is International Holocaust Remembrance Day. The Red Army liberated Auschwitz on that day in 1945, so 2020 marks the 75th anniversary. Each year URemembers brings speakers and events to honor that history. The Program in Medical Ethics and Humanities is happy to collaborate and welcome Dr. Edith Sheffer, historian, author and senior fellow at the Institute of European Studies at UC Berkeley, to discuss her historical research on Dr. Hans Asperger and his work with autistic and disabled children in Vienna during the Nazi regime. We invite you to join us and consider the ethical questions raised by the fraught histories of Asperger’s ideas and actions. What do we do with medical research connected to Nazi ideology? How and when does the origin of medical research matter? The suggested reading for this session is the Introduction and Chapters 6 and 7 of Sheffer’s book, Asperger’s Children: The Origins of Autism in Nazi Vienna. Contact linda.carrlee@hsc.utah.edu for a pdf of this material.

See URemembers page for more events in this series.

This Evening Ethics is a collaboration with URemembers, The Office of Equity and Diversity, and the Eccles Health Sciences Library.

“Healthcare: Stories of Repair,” the sequel to Fall 2019’s “Healthcare: Stories of Rebellion,” will examine the idea of repair in all its meanings. What does it mean to be healed? How do we cope with the process of repair? What happens when we try to fix something that isn’t broken? This evening of stories, with some storytellers selected from the audience, will bring us together as a community to grapple with complex questions and find comfort in shared experiences.

This is a UtahPresents event that is co-sponsored with the Program in Medical Ethics and Humanities and the University of Utah Health’s Resiliency Center.

This Event requires Tickets.

Medical Humanities Speaker Series: Victoria Sweet, MD

Victoria Sweet, MD, agreed to work at Laguna Honda Hospital in San Francisco for two months but stayed twenty years. During that time, she completed master’s and doctoral degrees in the history of medicine, which, coupled with her patient care experiences, led her to develop a radically different approach to medicine. “[U]nderneath our scientific modern medicine was an earlier way of understanding the body,” she discovered: not corporate “fast medicine” where the body is viewed as a machine and the physician, a technological mechanic, but “slow medicine” where the doctor is more akin to a gardener, “stepping back and seeing the patient in the context of his environment.” This, Sweet argues, is the way to healing.

Victoria Sweet will visit Utah April 15-16 as our 2019-2020 Medical Humanities Lecturer. She is the award-winning author of God’s Hotel: A Doctor, a Hospital, and a Pilgrimage to the Heart of Medicine and Slow Medicine: The Way to Healing. She will lead Evening Ethics Wednesday, April 15: “Slow Medicine, Ethics, and the Case of Mrs. C.” and deliver an informal lecture on the main University campus April 16: “Hildegard of Bingen: Medieval lessons for Modern Medicine.” She also will meet with medical students and faculty interested in creative writing.

Dr. Sweet studied Hildegard of Bingen, a twelfth-century German nun and Abbess revered not only for her philosophy, theology, writing, and music, but also for her medical knowledge. What Sweet learned from her, among many things, was the critical significance of the “tincture of time”; “that kind of time-costly caring was what created the personal relationship between patient and doctor. And that relationship was the secret of healing.” Onto Hildegard of Bingen’s concept of the healing power of nature, Sweet grafts respect for modern medicine through engaging stories drawn from her own medical training.

Internal Medicine Grand Rounds: Brent M. Kious, MD, PhD & Margaret P. Battin, PhD, MFA

Internal Medicine Grand Rounds: Aid in Dying: Is Somatic Suffering Special?

With PMEH faculty, Brent M. Kious, MD, PhD and Margaret P. Battin, MFA, PhD

Thursday, February 27, 2020
Noon, Classroom A, SOM
Physicians Literature and Medicine Discussion Group

Wednesday, February 12, 2020
University of Utah Hospital Large Conference Room #W1220
6:00-8:30pm, Facilitated by Susan Sample, PhD, MFA

In Shock: My Journey from Death to Recovery and the Redemptive Power of Hope by Rana Awdish

Seven months into her first pregnancy, Rana Awdish checked into the emergency department of the Detroit hospital where she was completing her training as a critical care physician. She would lose not only the pregnancy and most of her blood volume; she would suffer septic shock, a stroke, liver tumors, miscarriage, and multiple surgeries over the ensuing months. As she transformed from physician to patient, Dr. Awdish also experienced indifference and disregard from her doctors, which she attributes to medical education: “I knew we valued the cure, the goal, the win. We were far less comfortable in the gray, shadowed area of suffering.” Too often, doctors are bound to the disease, rather than the patient; they emotionally detach from patients. To do otherwise is to risk losing control, and, as she notes, “risk carries with it an inherent degree of vulnerability.” Yet, it is precisely through exploring vulnerability—“a dark hole at the center of a flurry of what was otherwise highly proficient, astounding skillful care”—that physicians will connect to patients and colleagues. As Awdish notes, “I didn’t understand that open channels would replenish my supply of self. That there was reciprocity in empathy.” As you read Awdish’s memoir, note her comments on word choice as she repeatedly draws attention to the necessity of a shared language between doctors and patients. Do you agree? From a patient’s point of view, do you find her suggestions for improving medical training insightful or not?

Wednesday, March 11, 2020
University of Utah Hospital Large Conference Room #W1220
6:00-8:30pm, Facilitated by Gretchen Case, PhD, MA

RX: A Graphic Memoir by Rachel Lindsay

Rx: A Graphic Memoir is cartoonist Rachel Lindsay’s first book, telling her compelling personal story of how working on marketing campaigns for antidepressant medication, in order to have health insurance coverage for her own bipolar disorder, contributed to her declining health and hospitalization. Rx addresses intimate, personal issues of illness as well as broader, public issues of the US health care system.

Wednesday, April 8, 2020
University of Utah Hospital Large Conference Room #W1220
6:00-8:30pm, Facilitated by Susan Sample, PhD, MFA.

Man’s 4th Best Hospital by Samuel Shem

Fast forward forty years: Roy Basch, M.D., and colleagues who suffered through their internship years in the 1970s at the hospital known as House of God are recruited to work at a new “Future of Medicine Clinic: Care, Compassion, and Cancer.” It is part of a fictional academic medical center known as Man’s Best Hospital—until it dropped to number four in national rankings. The reasons? Electronic medical records, hospital mergers, corporate medicine, and insurance companies; villains Basch and his friends battle in this comic sequel to Shem’s The House of God. The 1978 novel, a cynical view of medical training that “scandalized prominent reviewers within the health care community,” continues to be a favorite. Shem—a psychiatrist whose real name is Stephen Bergman—said he wrote his new novel “to resist injustice, and the danger of isolation, and the healing power of good connection.” One of the questions we will discuss is whether the book or novels in general can fulfill that intention. Please note: you do not have to read Shem’s original novel; the sequel should stand on its own merit.

Schedule of 2020 Readings can be found on our website

PMEH Calendar of Events

*The Physicians Literature and Medicine Discussion Group  6:00-8:00 pm
U of U Hospital Large Conference Room #W1220

In Shock: My Journey from Death to Recovery and the Redemptive Power of Hope by Rana Awdish Facilitated by Susan Sample, PhD, MFA

RX: A Graphic Novel by Rachel Lindsay Facilitated by Gretchen Case, PhD, MA
Man’s 4th Best Hospital by Samuel Shem Facilitated by Susan Sample, PhD, MFA

Wed. Feb. 12
Wed. Mar. 11
Wed. Apr. 8

Resident Ethics Conferences  12:30-1:15 pm

Impaired Health Professionals: What to do when colleagues need help
VAMC: 2nd floor Tsagaris Rm: Leslie Francis, PhD, JD & Megan Call, PhD
UUHosp 4th floor SOM, Cartwright Rm: Leslie Francis, PhD, JD & Megan Call, PhD

Tues. Feb. 4
Tues. Feb. 18

How to disclose bad news
UUHosp 4th floor SOM, Cartwright Rm: Gretchen Case, PhD, MA & Paige Patterson, MD
VAMC: 2nd floor Tsagaris Rm: Gretchen Case, PhD, MA & Paige Patterson, MD

Tues. April 21
Tues. April 28

*Evening Ethics
“Asperger, Autism, and Nazi Medicine” with Dr. Edith Sheffer, 5:30pm-7pm, EHS, Lower Level
UtahPresents: Healthcare: Stories of Repair, 7:30 pm, Kingsbury Hall

“Slow Medicine, Ethics, and the Case of Mrs. C.” with Victoria Sweet, MD, 5:30pm-7pm, location TBD

Tues. Feb. 4
Fri. Feb. 7
Wed. April 15

Lectures
Internal Medicine Grand Rounds: Aid in Dying: Is Somatic Suffering Special?
with Brent Kious MD, PhD & Margaret P Battin, MFA, PhD, noon, Classroom A

Thurs. Feb. 27

“Hildegard of Bingen: Medieval lessons for Modern Medicine” talk by Victoria Sweet, time & location TBD

Thurs. Apr. 16

Disclosure: None of the faculty or planners or anyone in control of content for this continuing medical education activity have any relevant financial relationships since the content does not cover any products/services of a commercial interest; therefore, there are no relevant financial relationships to disclose. AMA Credit: The University of Utah School of Medicine designates this live activity for a maximum of 1 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. All attendees are encouraged to use the CME system to claim their attendance. Physicians will be awarded AMA PRA Category 1 Credit(s)™; all other professions will be awarded attendance at a CME event credit that they may use for their re-credentialing purposes. All users will be able to print or save certificates. For questions regarding the CME system, please contact the UUCME Office. For questions regarding re-credentialing process or requirements, please contact your re-credentialing organization. ACCREDITATION: The University Of Utah School Of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. NONDISCRIMINATION AND DISABILITY ACCOMMODATION STATEMENT: The University of Utah does not exclude, deny benefits to or otherwise discriminate against any person on the basis of race, color, national origin, sex, disability, age, veteran’s status, religion, gender identity, gender expression, genetic information, or sexual orientation in admission to or participation in its programs and activities. Reasonable accommodations will be provided to qualified individuals with disabilities upon request, with reasonable notice. Requests for accommodations or inquiries or complaints about University nondiscrimination and disability/access policies may be directed to the Director, OEO/AA, Title IX/Section 504/ADA Coordinator, 201 S President’s Circle, RM 135, Salt Lake City, UT 84112, 801-581-8365 (Voice/TTY), 801-585-5746 (Fax).
Program Members on the Road and In Print

Gretchen Case won the School of Medicine’s Core Educator Award for Scholarship for furthering the core educator mission and reputation through publications and presentations at the regional or national level. Gretchen Case also has two new publications, both related to research in medical education:

Peggy Battin will attend the “National Clinicians Conference on Medical Aid in Dying” in Berkeley, February 14-15, 2020, the TEDMED conference in Boston March 2-3, the Hastings Center workgroup on dementia, part 2, in New York City, March 30-31, and the Conference on World Affairs, in Boulder, April 8-11.

Susan Sample is featured in the Wall Street Journal article, The Healing Power of Poetry. Susan Sample also co-directed, with Gretchen Case, a narrative medicine workshop for genetic counseling graduate students Nov. 14 at the U of U School of Medicine, and also co-facilitated a visual art-creative writing project for patients and their families November 20 at the annual Patient Advocacy Meeting, sponsored by the Pancreas Cancer Research Program at Huntsman Cancer Institute.
