TITLE: What do we really know about implant metals?

SPEAKER: Jodie Levitt, MD

AUTHORS: Jodie Levitt MD

CITY/STATE: SLC, UT

ABSTRACT:
Neurosurgeons have been implanting metals for over 25yrs. After many PFO and hip implants with problems recently seen in the media, and a recent personal experience, this lecture will provide an extensive review of metals used in plating and implants (many of which I was unaware), medical complications encountered, and testing/treatment options post op.

Recommendations will be provided for preop patients at high risk, including the literature data on sensitivity of these tests.
