TITLE: Creating and executing a neurosurgical mission trip.

SPEAKER: JAYSON NEIL  
CITY/STATE: OVERLAND PARK, KS

AUTHORS: JAYSON NEIL

ABSTRACT:

In the United States we have an abundance of skill and resources which are unavailable in much of the world. Nevertheless, translating and transporting such complex medical care to places without access remains a challenge.

With proper planning and investment, mission trips can provide an underserved area with lasting improvement to the lives in that region as well as to those participating in delivering that care.
