WHICH COVID TESTS TO TAKE WHEN EXPOSED

I WAS EXPOSED* TO COVID-19

Do you have any symptoms currently or are developing symptoms?
I have a fever, loss of taste/smell, cough, sore throat, runny nose, GI symptoms, fatigue, muscle aches, headache.

**YES**
STOP!
Follow the instructions for COVID-19 Symptoms.

**NO**
Continue to work and monitor for symptoms and mask carefully while at work, even if working in a non-patient facing location or non-health care setting that no longer requires mask use.

Consider getting tested around day 5 after a high-risk exposure.

*Exposed: > 15 minutes of face-to-face contact with someone with COVID-19 when either you or they were not masked.

NOTE THAT THE HIGHER RISK EXPOSURES ARE IF YOU:
- Were present during an aerosol generating procedure when you were not wearing a PAPR or N95/eye protection
- Live with someone who currently has COVID-19
- Have prolonged unmasked close contact with someone who was unmasked and currently has COVID-19

If tested

Test +
Follow instructions for a positive COVID test.

Test -
Continue to work as long as you do not develop symptoms. But, you must continue to mask in ALL locations at work for 10 days following an exposure.
