Division of Plastic Surgery
Call Room Policy

The GME office has supplied flex rooms available for trainees in programs that do not have a designated call room. Workroom is located on the first floor, room 1315. Entrance is between E13-14. Badge through and enter past elevators. Take an immediate left, workroom is straight ahead.

When the trainee leaves they will call the help desk to alert them that the room is vacant. This will allow the helpdesk to call EVS to clean the room. It will also allow the helpdesk to know the room is available for other trainees to schedule. Details of these rooms are sent out regularly to the trainees.

In addition to the flex rooms, in the HELIX building they have an office space in HELIX 4S142, a room with a sleep chair in HELIX room 4S135 as well as an additional shared wellness room with a bed for napping and overnight purposes in HELIX room 4S117.

All call is taken from home but should you choose to sleep at the hospital these options are available.

Should a resident feel too fatigued to safely return home and the resident elect to go home. The Division of Plastic Surgery will reimburse the resident for the cost of the ride from the hospital to their home.
